

PILLA SRI SAI RAHUL

Mechatronics Engineering · Robotics · Embedded Systems · AI Integration

+91 96523 71580 · fabledadventurer.pssr@gmail.com · linkedin.com/in/sri-sai-rahul-pilla · github.com/1RY-O

PROFILE

First-year Mechatronics Engineering student at Mahindra University focused on robotics, embedded systems, IoT, and AI-enabled applications. Developed Lumis, an open-source full-stack AI journaling prototype integrating React, Firebase, Node.js, Google Cloud Run, and the Gemini API. Currently building hands-on experience with Arduino, ESP32, sensors, actuators, and IoT systems through robotics training. Demonstrated passion for introducing AI tools to peers and seeking to deepen Claude expertise while championing its adoption across the Mahindra engineering community.

EDUCATION

Mahindra University — B.Tech in Mechatronics Engineering · 2026 – 2030

Relevant coursework: Engineering Mathematics · Programming Fundamentals (C/C++) · Introduction to Electronics · AI Tools & Development

Class XII — 89%

PROJECTS

Lumis — AI-Powered Journaling & Reflection Platform

React · Vite · Firebase · Firestore · Node.js · Express · Google Cloud Run · Gemini API · 2025–2026

- Developed an open-source full-stack AI journaling prototype for structured reflection and idea exploration.
- Designed as an exploration of how Claude-class AI can enhance student productivity. Demonstrates practical integration of AI APIs in real-world applications and serves as a reference project for teaching peers AI integration.
- Integrated the Gemini API to transform unstructured journal entries into validated, structured reflections using JSON-based outputs.
- Implemented authenticated user flows with Firebase Authentication and per-user Firestore data isolation.
- Designed backend architecture using Node.js/Express and Google Cloud Run with server-side API credential management.
- Leveraged AI-assisted development workflow (Cursor, Manus 1.6 Lite) integrated with GitHub for accelerated iteration.
- GitHub: github.com/1RY-O/lumis-journal

EXPERIENCE & TRAINING

IoT & Robotics Trainee — Unlox Academy · 2026 – Present

- Developing hands-on IoT systems using Arduino, ESP32, sensors, and actuators.
- Building and testing sensor-driven systems and microcontroller-based control logic.
- Working with IoT communication and data-flow concepts, including MQTT. Prototyping with Tinkercad and Wokwi.

Team Leader — Entrepreneurship Cell, Mahindra University · 2026 – Present

- Coordinating team activities and contributing to ideation, planning, and execution of entrepreneurial initiatives.

COMMUNITY & ADVOCACY

- Open-source contributor (Lumis) — sharing code and development practices with peers.
- Active in Gen AI and emerging tech communities at Mahindra University.
- Interested in teaching Python, embedded systems, and AI concepts to fellow students.
- Passionate about making AI tools accessible and demystifying LLM capabilities for the student community.

HACKATHONS & ACTIVITIES

- Hack2Skill — Gen AI APAC Ideathon (Participant/Builder, 2026)

- AssemblyAI × LabLab AI Hackathon (Participant/Builder, 2026)
- Active in AI, software development, robotics, and student entrepreneurship communities.

TECHNICAL SKILLS

Languages: Python · C · C++ · HTML

Embedded & IoT: Arduino · ESP32 · Sensors · Actuators · GPIO · PWM · MQTT

AI & APIs: Gemini API · Claude · Structured Output · Prompt Engineering · AI-Assisted Development

Web & Backend: React · Vite · Node.js · Express · REST APIs

Cloud & Databases: Firebase · Firestore · Google Cloud Run · Cloud Secret Manager

AI Development & Tools: Cursor (AI Code Editor) · Manus 1.6 Lite · Ideogram (AI Image Generation)

Version Control & Platforms: Git · GitHub · VS Code · Tinkercad · Wokwi · Termux

CERTIFICATIONS

BE10X — AI Tools & Claude Workshop | Certificate of Completion | Aug 2026

Covered AI-assisted presentations, data analysis, coding, and debugging. Eager to deepen Claude expertise and share insights with the Mahindra community.

Python — Udemy | In Progress

C/C++ — Udemy | In Progress
